

Daniel Island Office/Retail Building

Daniel Island, South Carolina

Client: James Doran Company

Completion: 2005

The firm designed this two-story mixed-use office/retail building as part of a retail complex on Daniel Island. The building includes ground floor retail space, and a common lobby/elevator core for the second floor office space. The building was designed to fit the urban fabric of the Daniel Island Commercial district and includes a combination of brick, and cast stone elements. The work included seeking design approvals from the City of Charleston Commercial Corridor Review Board and the Daniel Island Property Association.
